

MOTORCYCLE/ATV/SNOWMOBILE LIFT \$3,295

Suitable for Motorcycles, ATVs, quads, side-by-sides

This a heavy-duty lift, the platform consists of 3 sections: main platform is 30" wide with two 15" slide-in extensions. The extensions each have 4 pipe slides so there is no deflection. Use with or without the extensions inserted. (Motorcycle vs ATV)

There are front and rear drop-outs for easy tire removal

The control box is magnetic for out of the way placement but easy retrieval

Built-in safety locks

Heavy duty cylinder and structure

110v power provides very smooth, non-jerky operation with the heavy-duty hydraulic system

Includes:

- Built in wheel castor kit for easy movement in all directions. The wide base provides great stability at all times
- Motorcycle lifting jack
- Front wheel chock that can be removed when not in use.
- 3 drive-on approach ramps
- Deck has tie-down hooks with included straps

Optional:

Front wheel vice instead of flip-down wheel chock.

Specifications:

Lifting Capacity	2,200 lbs
Lifting height in top position	48"
Maximum platform width (with both wings)	60" (30" + 15" + 15")
Minimum platform width	30"
Length (Wheel chock at the front is on a panel that is extendable even further for extra-long motorcycles)	87"

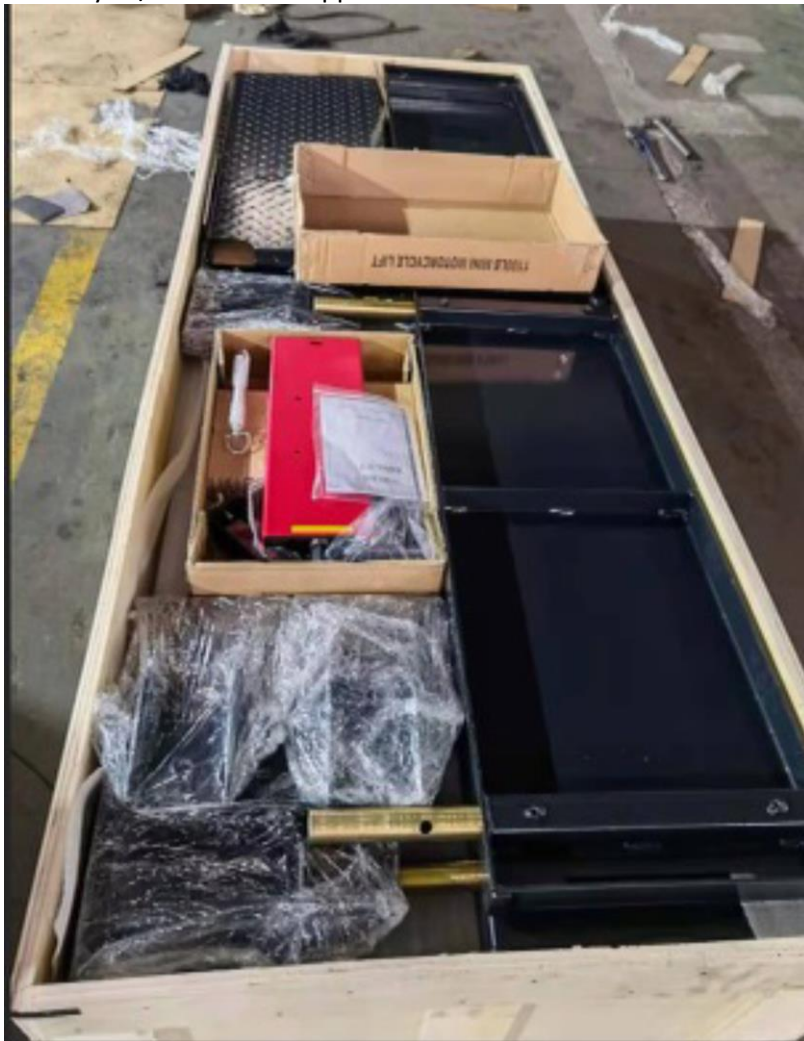

Easy rolling, swivelling wheels on a wide, stable base.

Motorcycle/ATV lifts as shipped
